

WHIPPA-GUARD® is a durable, recycled and recyclable plastic line trimmer protector for saplings and trees. Here's some compelling reasons why WHIPPA-GUARD® is the best choice for tree protection..

## 1 Save your precious trees..

WHIPPA-GUARD® saves saplings and trees from significant damage or death caused by line trimmers or “whipper-snippers”..

## 2 Aussie made. Aussie tough..

Proudly Australian-made, WHIPPA-GUARD® is super durable, able to withstand the heaviest of line trimmer contact.

UV stabilised to ensure long lasting protection from the harsh Australian environment.

## 3 Better for the Planet..

We took plastic destined for landfill and created an easy to install line trimmer protector.

Every WHIPPA-GUARD® is made from 100% recycled plastic (Promeg transeco®) and certified 100% carbon neutral via the purchase of carbon offsets.

## 4 Flat-packed to stack more..

We kept transport and storage in mind when designing WHIPPA-GUARD®.

Our flat-pack design allows up to 5,000 WHIPPA-GUARDS per pallet, keeping freight and storage costs down.

### WHIPPA-GUARD® Specifications

- ☑ 250mm H x 500mm W (flat)
- ☑ 1.1mm thick, durable, flexible sheet
- ☑ 2-latch system to lock in place
