

# TURF START

Organic 2000's range of fertilisers provide a cost effective commercial fertiliser which can be used in all stages of turf growth and maintenance.

Endorsed by the Turf Growers Association these fertilisers are used in commercial turf farms, by local shires and on golf courses.

The ability to reduce leaching make them particularly popular near water ways and other environmentally delicate areas.

This slow release organic fertiliser naturally develops the soil providing a bank of nutrients at the root zone during turf development.

## **Turf Start is ideal for;**

- Turf development

## **Turf Start Benefits:**

- Creates humus and improves soil microbiology
- Reduces leaching
- Enhances water retention capacity
- Naturally balanced NPK

<b>Sample</b>	<b>Turf Start</b>
Total Nitrogen %	4.9
Total Phosphorus %	0.9
Potassium %	1.7
Sodium%	0.47
Calcuim%	1.9
Magnesium %	0.28
Total Sulphur	0.51
Copper ppm	130
Zinc ppm	240
Manganese ppm	325
Iron ppm	1850
Water Content %	13
ph (1:5 water)	7
