

Organic Nitrogen 7% w/v

Aminogro® MAXi N7 provides plants with an array of amino acids in the form of L-form free amino acids, peptides and polypeptides. Nitrogen is carried around inside plants in the form of amino acids so fertilising with amino acids is an efficient way of delivering Nitrogen to the plant. The organic carbon in Aminogro® MAXi N7 also enhances microbial activity which assists the plant to access other nutrients. Aminogro® MAXi N7 also acts as a natural chelator of other nutrients in tank mixes.
